

Good brands don't just look good,  
**they sound good too.**  
We help brands sound great.

**Your brand helps  
build relationships  
with your customers.**

*Average sales increase by 31.7%  
when businesses choose custom  
curated music over music that is  
not brand specific.*

On Vinyl is a boutique music design  
company that can craft your brand's  
sound profile.

What is music design? It is what makes  
food taste better, influences consumer  
purchasing behavior, maximizes customer  
experience, and adds a completely new  
dimension to your brand. Without sound,  
brands lose context, like a movie without  
a soundtrack.

services, visit [onvinylmedia.com](http://onvinylmedia.com).

**Choose Quality.  
Choose Local.**

*We are passionate about  
helping local businesses &  
local musicians.*

More than 50% of local Austin  
musicians make less than \$25,000  
annually including those with an  
alternate source of income. We're  
on a mission to change that. As a  
purpose-driven company, we are  
focused on creating a better,  
stronger local music community.

**Keep your business  
licensed & legal.**

*We keep you and your business safe by making  
sure you're in compliance with U.S. copyright  
law through our partnerships with the  
Performance Rights Organizations.*
